ACKNOWLEDGEMENT

Through this acknowledgement, I express my sincere gratitude to all those people who are associated with this project and are helping me with it to make it a worthwhile experience. First and foremost I would like to thank almighty for giving me courage to make this project. At the outset, I would like to propose a word of thanks for the people who gave me unending support and help in numerous ways.

Firstly, I express our thanks to **Er.** (HOD CSE DEPTT) who gave me this opportunity to learn the subject in a practical approach who guided me and gave me valuable suggestions regarding the project report.

Secondly, I would like to thank **Ms. Anita Sodhi** (Project guide) and **FACULTY MEMBERS** of O7 SERVICES who are giving me their immense support in completing the project. The atmosphere provided is full of gaining more and more knowledge and to keep enthusiastic nature. The teachers provide a lot of help in resolving my doubts and making this project successful in shorter time.

Lastly, I would also like to thank my parents and friends who help me a lot in finishing the project in a limited time.

I am making this project not only for marks but also to increase my knowledge. Thanks again to all who are helping me in completion of this project.

O7 Services is an ISO 9001:2015, MSME PB10D0011152 and Govt. Authorised (CAL-C) Company. They deal in Web Development, Mobile Application Development, Custom Software Development, UI/ UX Designing, Hosting services, Digital Marketing, Registration of Domain Names with the various latest extensions, AMC & MMC Services, Bulk sms and voice calls. They provide the most advanced IT solutions, supporting a full business cycle: preliminary consulting, system development, deployment, quality assurance and 24x7 support. With a rich experience of over 7 successful years, O7 Services tends to build long-lasting strategic partnerships with their clients to ensure affordable prices, timely delivery and measurable business results. Their Head Office is in Jalandhar and the Branch Office is in Hoshiarpur. Some of the products developed by O7 Services are- Vehicle Tracking System, Invoice Software, School Management System, Hospital Management system, Parents-Teacher Communication App, Fee Management system, Task Management System, Online Food Ordering App, Security App, Admission system, Inventory Software, Car Servicing App etc.

Apart from this, O7 Services also provides 6 Weeks/ 6 Months Industrial Training, Project Based Training, Corporate Training and Job Oriented Courses Training to the students on all major IT Trends like-

Full Stack Development (MEAN/ MERN), Flutter, Kotlin, Android, Swift IOS, Firebase, Python, Angular, React Js, Vue Js, Node Js, ASP.NET, .NET Core, PHP, Laravel, CodeIgniter, Software Testing, Cloud Computing, Blockchain, Data Science, Artificial Intelligence, Machine Learning, IoT, UI/ UX Designing, Digital Marketing, WordPress, Linux, CCNA, CCNP, CCNA Security, Network Security, MCSE, MCITP, Java, Spring, Hibernate, C/C++, Photoshop, Adobe Illustrator, CorelDraw etc.

Voice: +91- 8437365007, +91-181-5015007E-Mail: enquiry@o7services.com , hr@o7services.com

INTRODUCTION TO PROJECT

PROJECT :- “(CLARIZEN)”

Project Title : Product Comparison

A product comparison table contains a selection of similar items that highlights their main features. It facilitates decision making by helping a consumer focus on the similarities and differences between the items. Used properly, it can become an important tool for conversion generation.

It should be noted, however, that the comparison does not replace the detailed product description on each page. It is more of an information summary that does not go into technical specification. It is used to compare the basic characteristics of a small number of items for a quick comparative overview.

In the comparison table, the products are arranged in columns while the features are described in the rows. This is helpful for users, especially if they have to consider several features before making a purchase decision.

PROJECT DESCRIPTION

Product comparison analysis is a process by which you can determine the features and benefits of your product in relation to those of your competitors.

It can help you to identify what areas of your product need improvement and shape future product development based on customer demands.

In this blog post, we will outline five steps that will make product comparison analysis easy and thorough and how AI can be used to analyse product reviews and consumer content in order to get a more accurate picture of product performance.

3 PROJECT OBJECTIVES

1. Establish market position

A product comparison analysis helps you to identify where your product stands in relation to competing products in the market, thereby enabling you to make informed decisions about how best to improve or promote your product offering.

2. Identify needs and opportunities

By studying customer feedback, it is possible to identify unmet customer needs. This helps you to shape future product development so that it serves them better and gives them an improved user experience.

3. Compare features

Comparing features between products can show you where your product is leading or lagging behind its competitors. It also provides insights into customer preferences, which can help you tailor your product to meet customer demands.

3.2 FEASIBILITY STUDY

A feasibility study is a preliminary study which investigates the information needs of perspective

users and determines the resource requirements, determining the cost effectiveness of various alternatives in the designs of the information system, benefits and feasibility of proposed project.

The goal of the feasibility study is to evaluate alternative systems to propose the most feasible and desirable systems for development.

Types of Feasibility:

There are various measures of feasibility that helps to decide whether a particular project is feasible or not. These measures include-

Technical Feasibility Study -

The technical issues raised during the technical feasibility analysis are:

- Does the necessary technology exist to do what is suggested?
- Does the proposal equipment have the technical capacity to hold the data required to use the new system?
- Will the proposed system & components provide adequate responses to inquiries, regardless of the number or locations of users?
- Can the system be expanded?

The project should be developed such that the necessary functions and performance are achieved

within the constraints. The project is developed within the latest technology. Through the technology

may become obsolete after some period of time, due to the fact that newer version of same software supports older versions, the system may still be used. So there are minimal constraints

involved with this project. The system has been developed using Java the project is technically

feasible for development.

Operational Feasibility Study -

We have designed front end in XML by getting the information from the end user, which help us

in designing the GUI according to the end user's requirements. The end users can easily understand and expand it in the future.

This includes the following questions:

- Is there sufficient support for the users?
- Will the proposed system cause harm?
- The project would be beneficial because it satisfies the objectives when developed and installed. All behavioral aspects are considered carefully and conclude that the project is behaviorally feasible.

Economic Feasibility Study -

It involve estimating cost and benefits that can be tangible and intangible because of confusing

between the types of costs it is sometimes very difficult to divide the benefits out weight the cost.

The developing system must be justified by cost and benefit. Criteria to ensure that effort is concentrated on a project, which will give best, return at the earliest. One of the factors, which

affect the development of a new system, is the cost it would require.

The following are some of the important financial questions asked during preliminary investigation:

The costs conduct a full system investigation.

- The cost of the hardware and software.
- The costs conduct a full system investigation.
- The benefits in the form of reduced costs or fewer costly errors.

Since the system is developed as part of project work, there is no manual cost to spend for the proposed system. Also all the resources are already available, it give an indication of the system is economically possible for development.

3.4 Requirement Analysis:

SYSTEM REQUIREMENT SPECIFICATIONS

A software requirements specification (SRS) is a comprehensive description of the intended purpose and environment for software under development. The SRS fully describes what the software will do and how it will be expected to perform.

An SRS minimises the time and effort required by developers to achieve desired goals and also

minimises the development cost. A good SRS defines how an application will interact with system hardware, other programs and human users in a wide variety of real-world situations.

Parameters such as operating speed, response time, availability, portability, maintainability, footprint, security and speed of recovery from adverse events are evaluated. Methods of defining.

3.3 REQUIREMENT ANALYSIS

□ HARDWARE AND SOFTWARE REQUIREMENTS:

1.1.1 Hardware Requirements

- | | |
|--------------------|--|
| 1. Processor | – 11th Gen Intel(R) Core(TM) i5-1155G7 |
| 2. RAM | – 8GB |
| 3. Processor Speed | – 2.4GHZ |

1.1.2 Software Requirements

Front End Tool	:	PHP 8.2.6
Web Server	:	Apache Server 2.1.7.0 (or Above).
Back End Tool	:	MYSQL 5.5.8
Browser	:	IE 7.0/Mozilla Firefox 6.0/Cross
Operating System	:	Windows Operating System/Linux

6.2 DFD: Data Flow Diagram

Data Flow Diagrams were first developed by Larry Constantine as a way of expressing system requirements in a graphical form. DFD is also known as bubble chart and has a purpose of clarifying system requirements and identifying major transformations and will become the program in the system design.

Data Flow Diagramming is a means of representing a system at any level of detail with a graphic network of symbols showing data flows, data stores, data processes, and data sources/destinations.

Purpose:

The purpose of data flow diagrams is to provide a semantic bridge between users and systems developers.

The diagrams are:

- Graphical, eliminating thousands of words.
- Logical representations, modeling WHAT a system does, rather than physical models showing HOW it does it.
- hierarchical, showing systems at any level of detail and
- Allowing user understanding and reviewing.

DFD Symbols are as follows:

- The External Entity symbol represents sources of data to the system or destinations of data from the system.
- The Data Flow symbol represents movement of data.
- The Data Store symbol represents data that is not moving (delayed data at rest).

DFD FOR ADMIN

DFD LEVEL FOR ADMIN:

6.4 Database Tables:

Admin Table:

Contact Table:

OUTPUT:

A screenshot of a web browser showing a section of the "Clarizon" website titled "POPULAR PRODUCTS". The page displays three product items: 1) A bottle of "Bioderma Sensibio H2O" with a "SALE" badge. 2) A small brown bottle of "Chanca Piedra" with a "SALE" badge. 3) A box of "Umcka ColdCare" with a "SALE" badge. Below each product, there is a brief description and price: "Bioderma \$55.00", "Chanca Piedra \$70.00", and "Umcka Cold Care \$120.00". The background features a blurred image of three medicine bottles. The bottom of the screen shows a Windows taskbar with icons for various applications like File Explorer, Edge, and Google Chrome.

The screenshot shows a web browser window with three separate product pages side-by-side. Each page features a product image, its name, and a price of \$120.00. Below each product image are left and right arrow icons, likely for navigating through more products or pages.

- Rainforest Pharmacy Chancá Piedra**
\$120.00
- NATROL CetylPure**
\$120.00
- Nature's Way Umcka ColdCare**
\$120.00

The screenshot shows a web page titled "TESTIMONIALS" with three testimonial cards. Each card includes a circular profile picture of a person, a Latin quote, and the name of the person below it. The browser interface at the top includes tabs, a search bar, and various icons. The bottom of the screen shows the Windows taskbar with several pinned application icons.

TESTIMONIALS

"Lorem ipsum dolor, sit amet consectetur adipisicing elit. Nemo omnis voluptatem consectetur quam tempore obcaecati maiores voluptate aspernatur iusto eveniet, placeat ab quod tenetur ducimus. Minus ratione sit quaerat unde."

— Lucas Gallone

"Lorem ipsum dolor, sit amet consectetur adipisicing elit. Nemo omnis voluptatem consectetur quam tempore obcaecati maiores voluptate aspernatur iusto eveniet, placeat ab quod tenetur ducimus. Minus ratione sit quaerat unde."

— Andrew Neel

"Lorem ipsum dolor, sit amet consectetur adipisicing elit. Nemo omnis voluptatem consectetur quam tempore obcaecati maiores voluptate aspernatur iusto eveniet, placeat ab quod tenetur ducimus. Minus ratione sit quaerat unde."
